

TELENET

BY Paul Montgomery

In TAP issue #61, A. Ben Dump set forth the basics of accessing timesharing computer facilities. In this issue I want to go into details, explaining how to login to various types of systems, and explaining what you can do once you are there. This and the other computer articles in this series are written in a style assuming you have read issue #61, or have a basic computer knowledge. If you don't have issue #61, BUY IT!

The best computer network to freak around on is GTE TeleNet. They have local dial-ups in over 250 cities, and a million computers online. To obtain your local dial-up, call TeleNet Customer Assistance on their In-WATS at: (800) 336-0437, and ask them. They are happy to tell you.

When you get on TeleNet, as with any other computer network, you must give it the address of the computer you wish to access. The beauty of TeleNet is the fact that they arrange all the computers by Bell System Area Code! A sample address looks like this (the @ is the TeleNet prompt):
@ C 212164

The @ tells TeleNet that the connection is Collect (the computer company pays for your connection!). The 212 is the New York City Area Code, and 164 is the actual identifying number of the computer system.

If you were to go through and attempt a C 21201 through C212300 (they never go above 300) you could map out all of the computers online in the New York City area. When TeleNet connects you to a system, and you get sick of it, and want to dump it and get back to the TeleNet prompt, type @ C/R (where C/R is Carriage Return or Enter key) and you will be back at the familiar TeleNet @ prompt. Now type D C/R. D is for Disconnect.

If you get error messages while scanning, such as ILLEGAL ADDRESS; HOST NOT RESPONDING; REJECTING, etc. This means that there is no computer associated with that network address, or for some reason or another, the system does not want to accept any connections from TeleNet. Just ignore these addresses, and keep scanning. If TeleNet should hang, hit BREAK and you should be dropped back to the @ prompt. If all else fails, hang up and call back.

Some of the Companies which have computers on TeleNet are:

Dun & Bradstreet, TRW Credit, Wells Fargo Bank, CitiBank, Source Telecomputing, Dialcom Inc, Republican National Party, Democratic Party Computer, and thousands of other large and small business and industrial firms, colleges and universities, commercial computing services, data banks, and government agencies.

For you techno freaks, TeleNet accepts any almost any parity/odd configuration you care to send. TeleNet dialups are for 110/300 baud. GTE TeleNet Customer Service can also give you a 1200 baud dialup if you need one. Because TeleNet uses the CCITT X.25 packet network protocol standard, all users appear the same to most computers, so no incompatibilities exist. TeleNet operates as a multi-level hierarchical network consisting of a high speed 56 Kbps backbone network, and local distribution networks. Everything is redundant, and each intelligent node is equipped with standby processor components ready to take over immediately if active components fail, etc, etc, etc. I'm Paul, your GTE representative.... If you have any specific questions, write me c/o TAP!

Dial-a-jury

DETROIT — Three years ago Bruce Power owed Michigan Bell Telephone \$1,000. Now Bell owes him \$28,000.

It started when Power's phone was disconnected for nonpayment. Power got mad enough to sue a year later when a phone company bill collector called the school where he worked as a custodian and said damaging things.

Power has since paid his bill. It took a jury of probable telephone company customers less than an hour to find in Power's favor.

APRIL 1982 No. 74

CENTAPP

Central Texas Area Phone Phreaks

• Post Office Box 755 • Austin, Texas 78767 •

23 January 1982

Tom Edison, Editor

TAP
Room 603, 147 West 42nd St.
New York City, NY 10036

The most certain way to
succeed is always to try
just one more time.
— Thomas Edison

Howdy Tom:

Please announce to your group, and to whoever you can send the word to, that Centapp, the recently created association of Texas Phone Phreaks, is sponsoring a Spring conference. The name of the conference is TexComm 1982, with a theme to dwell on our latest research into penetration of telco and other corporate communications and computer systems. The date of the conference is Saturday March 20, and will be held here in Austin. If you aren't familiar with the Austin area, then hang on; more information on this conference will be reaching you shortly.

Austin is quite enviable in mid-March. The weather is warm, the sun is bright, the city is green, and the chicks are hornier than a Texas longhorn. We have quite a few hot night spots that will introduce you to the real Texas. It's going to be an interesting day, but moreover, it will be a memorable night!

Admission is \$3. Advance payment is encouraged. Address inquiries to Centapp, and info on hotels, etc. will be sent. It would be great for the whole TAP crew to make it down to Austin for the best time they'll have this year.

Austintaciously;

Mc. Bill
Mountain Bill
Director, Centapp

ANOTHER WAY TO "GET LOST"

MA BELL GIVES BOXES THE BLUES: American Telephone and Telegraph recently announced that it has developed a foolproof device for catching users of illegal "blue boxes." These ingenious electronic gadgets for defeating the phone company's long distance tone codes and making free telephone calls have been around for 10 years and cost the Bell System \$5 million to \$10 million a year. AT&T's new electronic manual detects blue box calls immediately and notes the phone numbers on both ends of the line. The caller is immediately warned that he has been discovered and will be billed for the call. How the device will work when both caller and receiver are at pay phones was not explained.

COMPUTER PRODUCES 147,000: A 147,000 Chicago area residents for a survey of the Oxford House outraged hundreds of recipients. They never stayed at the downtown hotel and demanded that their spouses be told this letter with a mistake. The letters resulted from a mixup of computer tapes. Hotel Manager Jerry Belongar said, "Some men called and demanded a reduction while their wives he... based in on extension phones. Another woman said she was sorry to learn the letter was a mistake because she had hoped to use it against her husband in a divorce proceeding. Belongar sighed, "It's things like this that make you wish you were sitting on a cushion sliding."

Go to a post office, preferably one out of your regular habitat, and rent a box. ID, etc. will be required. Pay the box rent for a full year, or for the longest period they will let you.

Now, have all your bills and other undesirable mail addressed to you at this box number. Let the mail stay in the box. (It might be wise to empty the box now and then for the first week or so so the postmaster will have no cause to suspect your plan). Mail that accumulates in the post office box will stay there until the box rent next becomes due and until the grace period has ended; could be up to or more than a year. The postmaster will then mark all the letters "box closed, unable to forward" and send them back to the senders. By now you can be long gone and almost forgotten about. (Except by those poor suckers with red faces who just got all their bills back!)

Because mail addressed to PO boxes is handled in this manner it is wise to make official inquiry about any firm using a box and to whom you have sent money and heard nothing after a reasonable length of time. Most firms who use PO box addresses are legit. More and more firms are using boxes because mail is delivered a little quicker and it is more secure. However, don't feel a bit bad about making inquiry if PO box users tend to ignore you. Postal rules now permit you to get the name and home address of box holders upon verbal request. No special forms or written request is required any more.

LETTERS

DEAR TAP

- Here's a few tips from a fellow reader and activist:
- SMOKE BUMPS:** 4 parts of sugar to 6 parts potassium nitrate (saltpeter). Heat over low flame until it seals, stir well. Pour into its future container (empty milk cartons do very well). Before it solidifies, embed a few wooden matches as fuses into the mixture. One pound fills a block nicely with thick white smoke.
- CHEMICALS:** A guaranteed cool source to order any chemicals is Chockick, Box 573, Bankesbury, Ontario, Canada, K6A-1 2. They will fish around for anything and guarantee anonymous replies to any order.
- EXPLOSIVES:** Petroleum jelly and potassium chlorate 1 to 1 by weight, is totally safe when wet but is highly explosive and shock sensitive when dry. Stir 3 gm potassium iodide and 5 gm iodine in a beaker with 50 ml water. Add 10 ml ammonium hydroxide (ammonia water) 10%. Filter and the resulting filtered acid is called nitrogen triiodide. When wet is very safe but upon drying becomes very explosive and shock sensitive, to the point of a feather setting it off.
- COUNTERFEITING:** Hexamethylenediamine completely bleaches any ink to a perfect white without harming the paper in any way.
- VANDALISM:** Ethyl mercaptan and butylseleno mercaptan are the most evil smelling substances on earth. Mixed with kerosene for long-lasting effect they can be so annoying as to render a building inhabitable.
- ALARMS:** The alarm companies use the phone lines to link the premises under protection with its protector, whether it be the police station or in bigger towns a security office. Sometimes the alarm is included in the warning list. The machine works like this: when the alarm is tripped, a dialing circuit dials the police, a security office and the owner in most cases. One can cut the outgoing phone lines from the building, and incapacitate the outside bells and horns, and upon entry the bells and horns will sound the alarm silently while the electronic dialer will try unsuccessfully to dial the police, owner and security office to warn them of the illegal entry.
- GUNS:** Canadian fire sells a handy starting pistol, revolver type, the barrel and revolving magazine of which can be easily drilled to 22 caliber size using a simple drill, bit and a table vise to hold the piece. This makes a cheap and easy to get Saturday night special.

TAP

THE MAD SCIENTIST

Those little "weather" radios offered at \$9.95 to about \$19.95 can be "tweaked" a bit to cover the DEA and FBI radio channels very well. Some will cover these frequencies without adjustment. Only problem is they have no squelch control and the hiss could drive you bananas. If you are in a fringe area you might have to improvise an outside or attic antenna to pull in the signals when they are not working through a repeater.

DEA is into CB pretty heavily along the coast. They monitor this service continually and on occasion switch to CB for 2-way work. A little listening on VHF (on your weather radio!) will teach you their lingo and pretty soon you'll be smarter than they are!

Counterfeit

A pair of fake \$20 bills, above, were discovered after being passed at a South Plainfield tavern between Sunday night and early Monday morning. The counterfeiters, which are actually \$11 bills on which are taped the snail of \$20 bills, are usually passed with the counterfeiters hand placed over the picture of Washington, police said.

Bogus \$20 bills passed at tavern

SOUTH PLAINFIELD: Borough police officials are warning local merchants, especially bar owners, to be on the lookout for bogus \$20 bills. A bartender at Norman's Bar and Grill, Oak Tree Avenue, accepted two bogus \$20 bills sometime between 8 p.m. Sunday and 1 a.m. Monday, according to police.

At first glance the bills look real, according to Lt. Thomas Bellace. But closer observation reveals the two snails of the \$20

bills have been taped to the snail of a \$1 bill. According to Bellace, a counterfeiter will attempt to pass the fake bill by covering the picture of Washington as he hands over the bill.

Bars are usually dimly lit so it is difficult to spot the irregularity, he said.

This is the time of year, he said, that there is an upsurge in passing phony money because people are drunk and there is lot of cash around.

Abbie Hoffman

The former Yippie leader has been a resident in 11 different jails during the years in "The Movement," but now he's visiting to help young people from finding help on the move.

Abbie Hoffman said he was a security consultant since 1968, and he was a security consultant since 1968, and he was a security consultant since 1968.

what he had would be "the bottom party in town" — one that would break young people trying to link drugs. The word he had himself said at Studio 54 — the scene in the past of highly publicized drug arrests and investigations — from 9 p.m. to dawn, but the benefit of Hoffman, a community treatment house for young adults on 16th Street.

Hoffman said 1,300 tickets at \$20 for have already been sold for the party, and the event should put Hoffman over the top to the drug scene and a million bucks to move into a residential facility up on 16th Street.

Many of the Vietnam veterans who told about the drug scene to be rehabilitated, and Hoffman, a consultant at the health who is a work-release program from the Federal Prison System, said he was a security consultant since 1968, and he was a security consultant since 1968, and he was a security consultant since 1968.

Back Issues are \$7.5 each. Issue \$50 is \$1.50.

Subscriptions - 10 issues - US Bulk Rate \$7.

US Bulk Envelope Rate \$8.

US First Class in plain sealed envelope \$10.

Canada & Mexico First Class \$10.

Foreign Surface \$8. - Foreign Air Mail \$12.

IMPORTANT! Please include your mailing label or a **FOR COPY** whenever you write to TAP about your subscription.

Electronic Courses - \$7.5 each. A - DC Basics, B - AC Basics, C - Phone Basics, D - Amplifiers. TAP "Ma Bell" Patch - \$1.50.

TAP 10th Anniversary Pen - \$3.00.

Ma Bell's Tape - \$4. - West Coast Crunch. At Bell. Joe Engelstein & Bell Security Chief John Doherty, send **CASH**, check, or money order to:

TAP, Room 603, 147 West 42nd Street, New York, N.Y. 10036.

The TAP Classified Ad Sheet is published as a service to our readers. All ads MUST be typed and camera ready. Ads will appear in the next ad sheet unless they arrive after printing deadline in which case they will appear in the following ad sheet. The cost per ad per issue is \$4. If you wish to preserve your anonymity, TAP Box numbers are available at the cost of \$5 per ad per issue. This extra cost is for the postage to mail you the replies to your ad. Full page ads cost \$12 and half-page ads cost \$6. Payment must accompany all ads. Send cash and get a 10 % discount on all ads. Address all ad requests to : TAP, Room 603, 147 West 42nd Street, New York, N.Y. 10036.
